

**The LED Candle** is the safe and clean replacement to the wax candle. It has a gentle flicker looking exactly like a regular wax candle. With LED Candles, you can say goodbye to the wax mess, dirty smoke and fire risks, while providing a warm ambiance that you've come to expect from old-fashioned messy wax candles. You can also create your own atmosphere. Great for restaurants, promotional events, parties, receptions, Halloween and Christmas displays, weddings and home decor etc . . .

### Features:

- Flame flickers like real candle
- No fire, no smoke, no risk, nothing to worry about
- No flame to blow out in the wind
- On/off switch on the bottom or blow the light to turn on/off
